

Figure 17: The image illustrates scenes rendered without applying any materials and displays partial PCG components used for each scene (presented as a composition of geometry nodes).

Aesthetic Score

Aesthetics Score: Judges are required to rate the images based on subjective feelings, and there are a total of five criteria, namely: very poor, poor, fair, good, very good
Poor (1-2 points): The image lacks attractiveness and may have serious defects in terms of serious compositional problems, colour disharmony or blurred details. It is difficult to generate positive feelings when viewing.

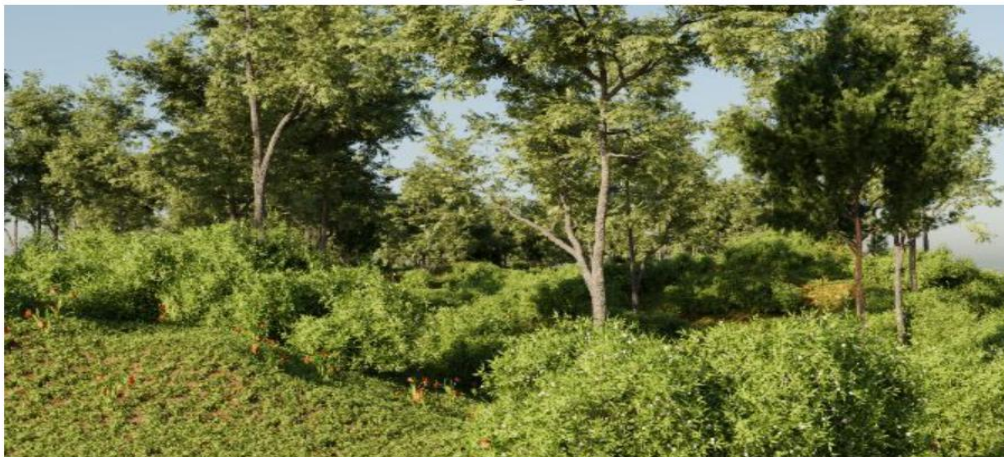

Below Average (3-4 marks): The aesthetics of the image is low, there may be some compositional or colour problems, the viewing experience is affected to some extent, but there is still room for improvement.

Average (5-6 marks): The image has basic aesthetics, with a well-balanced composition and colour scheme, but may lack uniqueness or impressive elements. Overall an acceptable level.

Good (7-8 marks): The image presents a high level of aesthetics, with a sophisticated composition and harmonious colour scheme, making for a good viewing experience. There may be some room for minor improvements, but overall the performance is excellent.

Excellent (9-10 points): The image presents a high level of aesthetics, with a unique and sophisticated composition, and a harmonious and engaging colour scheme. It creates a strong positive feeling when viewed and achieves a high level of artistic expression.
